# ALMANAC, FOR 1847.

Being the latter part of the 71st year of the Independence of the United States of America, and after the 4th of July, the beginning of the 2d; the 616th year of the Julian period; the latter part of the 526th and the beginning of the 5693d year since the Creation of the World, according to the Jews; and the 2600th year (according to Varron) since the foundation of Rome; and the latter part of the 1263d, and the beginning of the 1264th (lunar) year, since the Hicira, or flight of Mahomet.

The astronomical computations are given for the mean time at Cincinnati.

The time of Sun rising and setting, has reference to the upper limb; as also the rising and setting of the Moon.

Venus will be evening star to the inferior conjunction, which will take place on the 29th of September, and will be most brilliant as she approaches and recedes from the inferior conjunction, from which she will be a morning star to the end of the year.

Mars will be an evening star from the 1st of November to the end of the year.

Jupiter will be an evening star from the beginning of the year to the inferior conjunction on the 20th of June; morning star to the end of the year.

Saturn will be visible in the evening, from the 1st September to the end of the year.

There will be four Eclipses, two of the Sun, and two of the Moon, all of which will be invisible in North America.

1st of the Sun,	on the 15th of April.
2d " " "	18th of October.
1st " Moon,	21st of March.
2d " " "	24th of September.
